About Me

I graduated from the web design and coding department at university. Due to my interest in informatics and technology, I improved myself in the software department, took html, css, javscrpt courses and am actively learning React JS. I am ready to work in this sector. I had the opportunity to provide software support to several companies.

Skills

- Creativity
- Developing Websites
- Critical Thinking

Programming Skills

- HTML
- CSS
- Bootstrap
- React

Education

Acunmedya Academy
Nisantası University   2024-?

I am currently enrolled in the Front-End Developer program at Acunmedya Academy. Through the projects I work on, I continuously enhance my skills and strive to improve day by day. The program consists of two levels: basic and specialized training. Having completed the basic level, I am now advancing to the specialized training phase.

What did I do at the academy ?

- Creating Websites with using HTML/CSS and Javascript
- Building Many Type of Websites
- Building Forms
- Making interact vebsites
- Dark Mode
- Games with Javascript games
- Using Github

web design and coding
